"Gotta try it!"

Debco Plant Food

Water Soluble Fertilisers for all your garden needs. Have some on hand to mix in a watering can to use on all your potted plants and veggies

Debco
WATCH IT GROW

Summer Garden Care

- Ensure all garden beds are well mulched with sugar cane or lucerne. Don't smother plant stems!
- Apply **SaturAid** to all garden beds and even the lawn to draw water deep down into the soil
- **Droughtshield** used now protects plants from summer stress – well worth the effort!
- Always water in the cool of the day and remember that 'slow and low' is the best method AND it will reduce your water bill!
- The lawn should only be very lightly fertilised and set the mower blades higher for a longer cut – less water will be needed to keep the grass looking good
- Roses should be fertilised every 6 weeks (through until April) with Yates **Dynamic Lifter for Roses**
- Spray Roses with Yates **Rose Shield** to help prevent Black spot and mite damage or use the new **Confidor Tablets**
- Similarly all Citrus should be fed regularly with Yates **Dynamic Lifter for Citrus** – make sure that potted Citrus are kept well watered
- Spray Citrus fortnightly with Eco Oil to prevent Citrus Leaf Miner damage (squiggly lines on distorted leaves)
- vegies are growing fast and will need regular fertilising – use **Harvest** or **Nitrosol** every couple of weeks. Tomatoes are grass feeders so they like heaps of food.
- Grow Basil and Marigolds near Tomatoes to help beat those bugs! Pinch out Basil flowers to encourage more leaves and a longer life
- Push Confidor Tablets into the soil around Azaleas and Camellias to help prevent pest damage to the leaves
- Grow Radishes from seed – quick and easy and these are great sliced finely into a summer salad
- Australian Native shrubs will need cutting back after their main flowering – a good trim now will ensure a neat shape and improved flowering next year
- Similarly all Climbing plants will need to be trimmed – such as Wisteria and Jasmine
- Plant some Nasturtium seed in sunny spots and grab some Bedding Begonia seedlings or Potted Colour to liven up the garden beds and pots
- AND lastly...We are here to help you with any of your gardening questions – See you soon

Happy gardening

GreenGold

You want tough? – We've got tough!

\$10.98 or 2 for \$20

Seascape One of the best of the Lomandra family. Ideal for mass plantings AND will cope with neglect! (140mm)

\$55

'Mini Red' Flowering Gum

A Corymbia – Flowering Gum family – with dramatic flower heads (other colours available). The small tree is grafted to make it more adaptable to home gardens and only grows to about 3m high and wide. (200mm)

A gift for all seasons

\$55

'Mini Orange' Flowering Gum

We love this bright dazzler when in bloom – and the birds love the nectar-rich flowers. These Mini Gums only grow to 2m high and wide! (200mm)

\$10.98 or 2 for \$20

'Lime Wave' Yes – another Lomandra but a beauty! Very tough – perfect for dry difficult areas! (140mm)

Tip: Cut back all Lomandras quite hard every autumn

\$7.98

'Red Fountain' Grass Stunning burgundy foliage and feathery flower heads. A very useful clumping grass-like plant for driveways, around pools and in bush gardens. (140mm)

Meet the GreenGold Family
